

AMENDMENTS TO THE SPECIFICATION

Please insert the following paragraph at page 4, line 23, of the specification:

In one embodiment, the present invention provides a method of preventing or treating rejection of a grafted cell, tissue, or organ in a mammal comprising administering to the mammal a composition comprising a purified complex consisting essentially of a heat shock protein non-covalently bound to an antigenic molecule. In a preferred embodiment, the heat shock protein is not an alloantigen of the grafted cells, tissue, or organ.
